SUBJECT INDEX

Aging
aging of ammonium tetrathiomolybdate(VI) in air: an example of induced electron transfer by external oxidant, oxygen, L23
Aluminium
high temperature lattice parameters and thermal expansion of $Y_{1-x}Ce_xAl_2$ (x = 0, 0.15, 1) intermetallics, 91
phase relationships in the ternary system Ti–Au–Al at 775 K, 99

Beryllium
preparation and physical properties of a $BeRh_3B_2$ single crystal, 1
Borides
preparation and physical properties of a $BeRh_3B_2$ single crystal, 1
studies of the perovskite solid solution $Er(Rh,M)_3B_y$ ($M \equiv$ Pd, Pt and $0 \leqslant y \leqslant 1$), 263
Boron
note on the coercivity in Nd–Fe–B magnets, L17

Calorimetry
Mg_2Ni hydride: *in situ* heat conduction calorimetry of the phase transition near 510 K, 15
Cerium
high temperature lattice parameters and thermal expansion of $Y_{1-x}Ce_xAl_2$ (x = 0, 0.15, 1) intermetallics, 91
Chromium
Cr–Se system, 169
Cobalt
enthalpies of formation and hydrogenation of $La(Ni_{(1-x)}Co_x)_5$ compounds, 109
investigation of the partial phase diagram of the Pr–Co–Ni ternary system, 7
photo-induced hydride formation in rare-earth–Co (R_2Co_7) intermetallic compounds, L1
Coercivity
note on the coercivity in Nd–Fe–B magnets, L17
Corrosion
structure dependence of grain boundary corrosion in Nb bicrystals, 179
Crystal structure
crystal structure and spectroscopy of lanthanide complexes with glutaric acid, $[Ln(C_5H_6O_4)(H_2O)_3]ClO_4$, 153

Diffusion
uphill diffusion effects induced by self-stresses during H diffusion through metallic membranes, L27
Dysprosium
temperature hysteresis of the electrical resistance of Dy near the order–disorder transition, L9

Electrical resistance
temperature hysteresis of the electrical resistance of Dy near the order–disorder transition, L9
Electrodeposition
smooth electrodeposits of Mb from $KF–K_2B_4O_7–K_2MoO_4$ fused salt melts, 141
Electron transfer
aging of ammonium tetrathiomolybdate(VI) in air: an example of induced electron transfer by external oxidant, oxygen, L23
Erbium
studies of the perovskite solid solution $Er(Rh,M)_3B_y$ ($M \equiv$ Pd, Pt and $0 \leqslant y \leqslant 1$), 263

Gadolinium
ultrapurification of rare earth metals: Gd and Nd, 27
Glutaric acid
crystal structure and spectroscopy of lanthanide complexes with glutaric acid, $[Ln(C_5H_6O_4)(H_2O)_3[ClO_4$, 153
Gold
phase relationships in the ternary system Ti–Au–Al at 775 K, 99

© Elsevier Sequoia/Printed in The Netherlands

Hydrides
Mg_2Ni hydride: *in situ* heat conduction calorimetry of the phase transition near 510 K, 15
photo-induced hydride formation in rare-earth–Co (R_2Co_7) intermetallic compounds, L1
Hydrogen
uphill diffusion effects induced by self-stresses during H diffusion through metallic membranes, L27
XPS study of H implanted Zr, 229

Intermetallics
high temperature lattice parameters and thermal expansion of $Y_{1-x}Ce_xAl_2$ (x = 0, 0.15, 1) intermetallics, 91
photo-induced hydride formation in rare-earth–Co (R_2Co_7) intermetallic compounds, L1
Iron
microstructure and hydriding characteristics of FeTi alloys containing Mn, 275
note on the coercivity in Nd–Fe–B magnets, L17
single crystal growth of γ'-Fe_4N supercritical ammonia, 215
X-ray analysis and IR spectrocopic investigation of Fe and Mn hexaamminediiodides, 207
IR spectroscopy
X-ray analysis and IR spectroscopic investigation of Fe and Mn hexaamminediiodides, 207

Lanthanide complexes
crystal structure and spectroscopy of lanthanide complexes with glutaric acid, $[Ln(C_5H_6O_4)(H_2O)_3]\,ClO_4$, 153
Lanthanum
enthalpies of formation and hudrogenation of $La(Ni_{(1-x)}Co_x)_5$ compounds, 109

Magnets
influence of Zr on $Sm(CoFeCuZr)_{7.2}$ alloys for permanent magnets I: Identification of the phases by transmission electron microscopy, 249
note on the coercivity in Nd–Fe–B magnets, L17
Manganese
microstructure and hydriding characteristics of FeTi alloys containing Mn, 275
X-ray analysis and IR spectroscopic investigation of Fe and Mn hexaamminediiodides, 207
Metallic membranes
uphill diffusion effects induced by self-stresses during H diffusion through metallic membranes, L27
Molybdenum
smooth electrodeposits of Mb from $KF–K_2B_4O_7–K_2MoO_4$ fused salt melts, 141

Neodymium
note on the coercivity in Nd–Fe–B magnets, L17
ultrapurification of rare earth metals: Gd and Nd, 27
Nickel
enthalpies of formation and hydrogenation of $La(Ni_{(1-x)}Co_x)_5$ compounds, 109
investigation of the partial phase diagram of the Pr–Co–Ni ternary system, 7
structural study of the ternary alloys $Zr_{1-x}Ti_xNi_3$, 221
Ti–N system: phase equilibrium between the δ, ϵ and α phases and the conditions of formation of the Lobier and Marcon metastable phase, 123
Niobium
structure dependence of grain boundary corrosion in Nb bicrystals, 179
Nitride
single crystal growth of γ'-Fe_4N supercritical ammonia, 215

Optical spectroscopy
Raman and optical spectra of magnesia-supported perrhenates, 67
Order–disorder transition
the temperature hysteresis of the electrical resistance of Dy near the order–disorder transition, L9

Palladium
superconductivity and phase relations in the Pd–Se system, 79
Perovskites
evidence for a new family of compounds analogous to the perovskites, 245

studies of the perovskite solid solution $Er(Rh,M)_3B_y$ (M ≡ Pd, Pt and $0 \leqslant y \leqslant 1$), 263
Phase diagram
investigation of the partial phase diagram of the Pr–Co–Ni ternary system, 7
Phase equilibrium
Ti–N system: phase equilibrium between the δ, ϵ and α phases and the conditions of formation of the Lobier and Marcon metastable phase, 123
Phase relationships
phase relationships in the ternary system Ti–Au–Al at 775 K, 99
superconductivity and phase relations in the Pd–Se system, 79
Phosphates
synthesis and characterization of Ti phosphates, TiP_2O_7 and $(TiO)_2P_2O_7$, 201
Platinum
preparation of Yb_3Pt_5 and $YbPt_3$ single crystals and a study of their properties, 187
Praseodymium
investigation of the partial phase diagram of the Pr–Co–Ni ternary system, 7
Purification
purification and crystal growth of rare earth metals using solid state electrotransport, 45
ultrapurification of rare earth metals: Gd and Nd, 27

Raman spectroscopy
Raman and optical spectra of magnesia-supported perrhenates, 67
Rare earth
high-pressure synthesis and structural studies of rare earth (R) compounds RCuAl, L13
Rhenium
Raman and optical spectra of magnesia-supported perrhenates, 67
Rhodium
preparation and physical properties of a $BeRh_3B_2$ single crystal, 1

Samarium
influence of Zr on $Sm(CoFeCuZr)_{7.2}$ alloys for permanent magnets
I: Identification of the phases by transmission electron microscopy, 249
Selenium
Cr–Se system, 169
superconductivity and phase relations in the Pd–Se system, 79
Single crystal growth
single crystal growth of γ′-Fe_4N supercritical ammonia, 215
Solid state electrotransport
the purification and crystal growth of rare earth metals using solid state electrotransport, 45
Spectroscopy
crystal structure and spectroscopy of lanthanide complexes with glutaric acid, $[Ln(C_5H_6O_4)(H_2O)_3]ClO_4$, 153
Structural studies
high-pressure synthesis and structural studies of rare earth (R) compounds RCuAl, L13
Superconductivity
superconductivity and phase relations in the Pd–Se system, 79
surface magnetization in superconducting $NaHg_4$, 195
Surface magnetization
surface magnetization in superconducting NaHg4, 195
Surface study
surface study of chemically etched Ti, 237
Synthesis
high-pressure synthesis and structural studies of rare earth (R) compounds RCuAl, L13
simple and convenient synthesis of pentachlorozirconates, L5
synthesis and characterization of Ti phosphates, TiP_2O_7 and $(TiO)_2P_2O_7$, 201

Thermal conduction
Mg_2Ni hydride: *in situ* heat conduction calorimetry of the phase transition near 510 K, 15
Titanium
microstructure and hydriding characteristics of FeTi alloys containing Mn, 275
phase relationships in the ternary system Ti–Au–Al at 775 K, 99

structural study of the ternary alloys $Zr_{1-x}Ti_xNi_3$, 221
surface study of chemically etched Ti, 237
synthesis and characterization of Ti phosphates, TiP_2O_7 and $(TiO)_2P_2O_7$, 201
Ti–N system: phase equilibrium between the δ, ϵ and α phases and the conditions of formation of the Lobier and Marcon metastable phase, 123

X-ray analysis
X-ray analysis and IR spectroscopic investigation of Fe and Mn hexaaminediiodides, 207
X-ray photoelectron spectroscopy
XPS study of H implanted Zr, 229

Ytterbium
preparation of Yb_3Pt_5 and $YbPt_3$ single crystals and a study of their properties, 187
Yttrium
high temperature lattice parameters and thermal expansion of $Y_{1-x}Ce_xAl_2$ (x = 0, 0.15, 1) intermetallics, 91

Zirconium
influence of Zr on $Sm(CoFeCuZr)_{7.2}$ alloys for permanent magnets I: identification of the phases by transmission electron microscopy, 249
simple and convenient synthesis of pentachlorozirconates, L5
structural study of the ternary alloys $Zr_{1-x}Ti_xNi_3$, 221
XPS study of hydrogen implanted Zr, 229
